Deptec are pleased to announce their partnership with R&D Equipment OEM Plasmionique. This means that as well as the Deptec "EVOS" range of PVD cluster tools and legacy Varian, Novellus and AMAT system supply and support, Deptec can now offer a full suite of R&D equipment for both sales and support, including: PVD, CVD, PECVD, ALD, Etch, Ion Implant, benchtop systems and all the components and deposition sources for upgrades. The systems include:

- MAGNION – Sputtering systems and sources, including benchtop systems.
- EVAD – Thermal Evaporation systems including E-Beam, organic and standard sources
- FLARION – Plasma Etch with ICP options, PECVD, ALD, including benchtop systems
- PUPION – Plasma Ion Implant systems
- Horizontal Furnaces, plus other custom systems available.

Plasmionique have been in the R&D sector since 1999 and are based in Montreal, Canada. Deptec have exclusivity for sales and service in the UK and are available for technical appraisals and service work going through Plasmionique representative channels. Contact sales@deptec.com for more information.
